

Bubbling Cauldron

Sensory Art Activity

You will need:

- Paper towel or toilet paper rolls
- Dish soap
- Bowls
- Child friendly paint
- Cauldron printout (Cardstock recommended)
- Water

Instructions:

1. Printout the CCPRN cauldron page, cardstock is recommended but will work on regular computer paper as well. You can also cut the cauldron out and glue it on construction paper.
2. Have the children decorate their cauldron (optional).
3. Mix a tablespoon of dish soap, a tablespoon of water, and a few drops of paint into a bowl and mix together. Repeat for each colour you wish to use.
4. Have the children dip one end of the toilet roll into the colour mixture, then place it on their cauldron paper and lift up.
5. When the children lift the roll from the paper, there should be a colourful bubble on their page. You can invite children to pop the bubble or let it pop on its own! Repeat until their bubbly cauldron is complete.

Note: If there is no bubble when the children lift up, try adding a bit more dish soap to your mixture.
